

Talessa Mayara dos Santos Rodrigues

Product Designer | Design Systems | UX Research | B2B & SaaS Digital Products

rodriguesdesign@gmail.com | +55 35 99807-4669 |  [LinkedIn](#) |  [Portfólio](#) | São Paulo, Brazil | Open to Remote

Professional Summary

Product Designer with experience designing and improving web and mobile digital products, working on B2B and SaaS platforms, administrative systems, recruitment platforms, financial solutions, and e-commerce.

I work across the entire design process, from Product Discovery, user research, competitive benchmarking, and problem definition to information architecture, user journey mapping, prototyping, usability testing, interface design, and developer handoff.

I have experience building Design Systems from scratch, including foundations, components, variants, documentation, and interface standards to improve visual consistency and support product scalability.

I also have experience leading and mentoring designers, collaborating with Product Owners, developers, and cross-functional teams to turn user needs and business goals into feasible solutions. I use Artificial Intelligence tools to support research, ideation, prototyping, and design workflow optimization.

Professional Experience

Product Designer

Apr 2026 – Oct 2026

RHRecruiter Labs | Remote

UX/UI leadership and continuous improvement of a digital recruitment and selection platform.

- *Led UX/UI activities and mentored junior designers, providing guidance on design processes, interface standards, and delivery quality.*
- *Led the redesign of the company's landing page, improving information architecture, navigation, visual hierarchy, and calls to action, with a focus on conversion.*
- *Designed user journeys and workflows for recruiters, companies, and candidates, including registration, job management, interviews, and recruitment processes.*
- *Designed dashboards, administrative interfaces, and Design System components in Figma, including responsive layouts and light and dark modes.*
- *Collaborated with developers on documentation, design handoff, and feature improvements, considering usability, accessibility, and technical feasibility.*

Product Designer

Jan 2025 – Jul 2026

Conecta 360° | Remote

Development of a SaaS platform for managing and assessing psychosocial risks in compliance with Brazil's NR-1 regulation.

- *Contributed to building the product from scratch, conducting Product Discovery activities, requirements gathering, research, and competitive benchmarking to define key features.*
- *Structured information architecture, user journeys, and navigation flows for different user roles, including consulting firms, companies, and employees.*
- *Designed interfaces for campaigns, questionnaires, assessments, risk inventories, action plans, and reports, as well as dashboards with key indicators and data visualizations.*
- *Created wireframes, high-fidelity prototypes, and a Design System in Figma, defining the visual identity, reusable components, and interface standards.*
- *Collaborated with product and development teams to improve features, balancing usability, business requirements, and technical feasibility while working with Agile methodologies such as Scrum and Kanban.*

Product Designer

Jan 2024 – Oct 2026

Front End Fusion | Volunteer Work

Design and development of digital products, administrative platforms, and responsive interfaces in collaboration with cross-functional teams.

- *Participated in Product Discovery using Lean Canvas, Opportunity Solution Trees, and user flow mapping to identify needs and define solutions.*
- *Structured user journeys, information architecture, wireframes, and prototypes for web platforms and administrative systems.*
- *Contributed to transforming a landing page into a more comprehensive digital platform, designing responsive interfaces focused on usability and user experience.*
- *Participated in building a Design System, organizing reusable components, styles, and interface patterns in Figma.*
- *Collaborated with Product Owners, Scrum Masters, and developers on requirements definition, documentation, design handoff, and feature improvements.*

Product Designer

Aug 2022 – Dec 2023

North Studio | Remote

Design of digital products, websites, administrative systems, and web and mobile experiences for businesses across different industries.

- *Worked on digital product development, from requirements gathering and understanding business needs to interface delivery.*
- *Structured information architecture, navigation flows, wireframes, and high-fidelity prototypes in Figma.*
- *Designed interfaces for management systems, inventory control, delivery platforms, financial planning tools, and e-commerce, prioritizing usability and information organization.*
- *Developed visual identities, landing pages, and responsive websites, applying UI Design principles and visual hierarchy.*
- *Created reusable components and interface standards, prepared design handoffs, and collaborated with developers on product implementation and continuous improvement.*

Technical Skills

Product Design & UX: Product Discovery, UX Research, User Interviews, Competitive Benchmarking, Competitor Analysis, Design Thinking, Double Diamond, Lean UX, User Journey Mapping, Information Architecture, User Flows, Wireframing, Prototyping, Usability Testing, and Heuristic Evaluation.

UI Design & Design Systems: Interface Design, Visual Design, Design Systems, Foundations, Design Tokens, Component Libraries, Component Variants, Auto Layout, Componentization, Typography, Visual Hierarchy, Responsive Design, Accessibility, and WCAG Guidelines.

Design & Research Tools: Figma, FigJam, Framer, Miro, Photoshop, Illustrator, and Notion.

Artificial Intelligence & Automation: ChatGPT, Claude, Figma Make, and Generative AI tools applied to research, ideation, prototyping, visual creation, and design workflow optimization.

Development & Technical Collaboration: HTML, CSS, Basic Front-End Development Knowledge, Design Handoff, Interface Documentation, Developer Collaboration, and Technical Feasibility Assessment.

Project Management & Methodologies: Scrum, Kanban, Jira, Lean Canvas, Opportunity Solution Trees, Backlog Organization, Cross-Functional Collaboration, Design Leadership, and Mentoring.

Education

Bachelor's Degree in Product Design | In Progress UNIASSELVI

UX/UI Design Professional Program EBAC | May 2022 – Nov 2025

Additional Courses

- Product Design | Alura
- HTML & CSS | Alura
- Design Systems | Additional Training
- Photoshop & Visual Design Tools
- Artificial Intelligence Applied to Design
- UX/UI and Product Design Workshops and Practical Training
